Source: For the base year (2017) the population figures have been sourced from Experian's 'Retail Planner Reports' using CJ's (Experian-based) MMG3 Geographic Information System (GIS). The population figures are based on the ONS Sub-National Population Projections (2015).

For Zones 4 and 9 population for 2022, 2027 and 2032 have been provided by the Council, and are produced using POPGROUP model. The model uses a standard cohort component forecasting method to produce age specific population projections. The population age structure in the forecast's start year is based on 2016 Mid-year Population Estimates Office for National Statistics. The standard schedule of age-specific fertility and mortality rates is taken from the latest (2014-based) schedule produced by ONS. The standard schedule of migration rates (internal and external) are from a 5 year average of ONS estimates specific to Milton Keynes. The projections also take into account the population increase associated with the number of future dwellings, as set out in the proposed submission Plan:MK produced in October 2017.

For the remaining Zones, the population projections for zones are derived from Experian's revised 'demographic component model' - these projections take into account mid-year age and gender estimates and project the population forward year-on-year based on Government population projections for local authority areas in England. The yearly components of population change that are taken into account are the birth rate (0-4 age band), ageing, net migration, death rates, etc. The figures do not take account of the impact of local housing-led policy allocations on potential population growth, however these figures have been verified against the Council's projections that take into account forecast housing allocated growth and have been found to be compatible.

Source: Average spend per capita estimates (2015 prices) are derived from Experian 'Retail Area Planner' Reports using the MMG3 GIS and the year-on-year expenditure growth forecasts have been informed by the latest Retail Planner Briefing Note 15 published by Experian Business Strategies (December 2017).

Notes: An allowance has been made for the market share of retail expenditure per capita on non-store sales (SFT - including mail order and Internet shopping) at the base year informed by the household survey-derived market shares for SFT. Forecast growth in SFT is based on the year-on-year forecasts published by Experian Business Strategies in the most recent Retail Planner Briefing Note 15 (December 2017).
