

## **The Vision of Myself Balogun Francis and my party The Movement of the Popular Conservative Youth Front, MPCYF**

My party, the MPCYF, and I stand united in our beliefs of independence, personal responsibility, community, discipline, and innovation. We believe that in this rapidly evolving society, the youth require a voice of integrity, discipline, and strength.

My guiding principle, and by extension that of my party, is simple: to use the wisdom of the past to shape the decisions of the future.

### **Core Values:**

- **Independence:** I believe each individual must be able to experience the dignity of self-reliance and be able to forge their path within the future whether that be further education or work with advice from family or others close to them.
- **Personal Responsibility:** Each individual must strive to achieve their fullest potential through discipline, and accountability.
- **Community:** Community is a cornerstone of a thriving society built on shared values and mutual support.
- **Discipline:** Discipline is the foundation of good character, self-control, and achievement. It drives personal development and social order, ensuring the youth, the leaders of tomorrow will fulfil their roles with integrity and precision.
- **Innovation:** We believe in the power of ingenuity and technological advancement to address challenges, facing the youth of our community, and create opportunities for us and our families in the future.

### **Our Vision:**

I envision a Milton Keynes where a mix of tradition and progress is a source of strength, where future generations are empowered to flourish, and where responsibility and freedom go hand in hand. By protecting our community values, exchanging cultural heritage and embracing prudent change, we can ensure a brighter future for the young of today and generations to come.

### **Call to Action:**

The MPCYF and I call upon the youth to:

- Strengthen the bonds of community.
- Uphold the principles of responsibility, accountability, and order.
- Advocate for the protection of your freedoms and your future.
- Commit to less wasteful behaviour.
- Focus on extracurricular activities for those currently in education.
- Support your fellow young people (within reason)

### **Commitments:**

- **Opportunities for the Youth:** More job opportunities are something I and my party are committed to getting done for the youth of our city.
- **Crime Awareness:** We are committed to bringing awareness of different crimes that plague Milton Keynes and the youth, and do the best we can to hopefully eradicate them.
- **Focus on Eradicating Gang Culture:** For the advancement of young people in Milton Keynes, it is necessary to do our best to eradicate gang culture.
- **Encourage a More Welcoming Environment:** We must do our best to encourage a friendly and welcoming community to drive our youth to succeed.

### **Closing Statement:**

I believe that through the preservation of our positive values and the encouragement of discipline, we can secure a prosperous future that is both rich and just. We can band together and build a city that caters to and brings opportunities for our youth.
