

MKYC Manifesto

My name is Raiya, and I aspire to be a part of the Milton Keynes Youth Council because it would allow me to experience new prospects of life, to become able to learn new things and be inspired by others. I understand that such an important role like this requires spending a lot of social times in meetings and discussions, but this is a responsibility that I would take seriously. I will be reliable as I constantly meet deadlines whether its organising events or solving problems; I stay focused on goals even when challenges arrive.

I enjoy football, writing poems, ballet and running. Some issues I think are important and require change are climate change since it is damaging our quality of life and only, we have the power to fix it, poverty as many children in the world go to sleep starving whilst others waste money that can go to those in need.

Electing me to the Milton Keynes Youth council means choosing a passionate, creative and experienced leader who is committed to making a difference. I bring dedication, fresh ideas, and a strong sense of responsibility to every challenge I face. Together we can tackle critical issues whilst having the opportunity to thrive. Let's work together to make a brighter future for our community. Your trust in me will not be misplaced, I am ready to lead with purpose and vision.
