

My Manifesto

Yousuf Mohamed Sabras

Walton High Brooklands Campus

Hello, I'm Yousuf, a Year 7 student passionate about engineering, confidence, leadership, and space. As a former Head Boy, I know I can make a difference in our community.

I'm all about solving problems and making our world a better place. By embracing curiosity and innovation, I want us to find the best solutions for our future.

Believing in ourselves is key. My experience as Head Boy showed me that confidence empowers everyone to succeed. Let's support each other and grow together.

True leadership is about serving others with empathy and understanding. I'll work hard to listen and collaborate, ensuring our voices are heard and positive change happens.

Space Exploration: Space fascinates me and inspires us to think beyond our limits. I'll encourage interest in space science, setting our sights on the stars.

Problems:

Youth Crime: We need to create safe spaces and programs to tackle issues like drugs and knife crime.

E-Scooter Regulations: I'll work with authorities to create safe areas for e-scooters.

Mental Health: We need more resources and support for mental health.

Early Development: Implementing programs to support childhood development is crucial.

Creative Opportunities: I'll push for more projects like the Milton Keynes Theatre's Young Company.

Vote for me, and together we'll build a future where innovation thrives, confidence reigns, leadership serves, and imaginations soar.
